

The 2010 International Conference on High Performance Computing & Simulation (HPCS 2010)

June 28 – July 2, 2010
Le CENTRE DE CONGRÈS de CAEN
Caen, France

In Cooperation with the ACM, IEEE, IFIP
Co-Sponsored by IEEE France, ASIM, EUROSIM, CASS, JSST, LSS, PTSK, TSS, Université de
Caen - Basse Normandie, ENSICAEN, CNRS
(Pending)

Call for Workshops and Special Sessions

(Proposal Submission Deadline: November 15, 2009)

The 2010 International Conference on High Performance Computing & Simulation (HPCS 2010) Organizing Committee invites proposals for workshops and special sessions to be held in conjunction with the HPCS 2010 Conference.

Workshops and special sessions provide an opportunity for researchers to present results and participate in focused discussions of timely topics on various areas of high performance computing systems and technologies as well as their applications and use in Modeling and Simulation domains. The workshops and special sessions are to establish a common understanding of a certain aspect, to share experiences, to foster research communities, to learn from each other, to identify open problems and/or to explore future directions of research.

A workshop will typically be a full day (10-16 papers). A special session will typically have 4-6 papers. Workshops and special sessions will be published as part of the HPCS 2010 proceedings.

The workshops and special sessions are considered part of the overall HPCS Conference and hence included in the conference registration. For each workshop or special session, at least one organizer must commit to attending and running the workshop or session.

Requirements for submission of a workshop or special session proposal:

- * **Title** of the workshop or special session.
- * A brief technical **description** of the workshop or special session, identification of specific technical issues/topics, focus, and motivations / justification of its timeliness.
- * **Instructions** for paper submission and a description of the review process.

- * The **names**, postal addresses, phone numbers and e-mail addresses of the proposed workshop **organizing committee**. This committee should consist of members knowledgeable in the technical issues to be addressed by the workshop or special session.
- * **Primary contact(s)** of the organizing committee.
- * **Estimated** number of participants, length, and important dates of the workshop/special session.
- * The means of **publicity** and soliciting **participation**.
- * Any **resources** that may be required, such as one day or half day workshop/special session, expected room size, whether a panel setup is needed, etc.
- * Information about the **previous edition** of the workshop/special session (if any): attendance, number of papers submitted, number of papers accepted.

All proposals should be submitted by electronic mail as a .doc attachment. Samples of previous proposals can be found on the HPCS 2009 web site at <http://cisedu.us/cis/hpcs/09/main/callForPapers.jsp> under *Documents* menu.

Important Dates to observe will be:

- * Proposal Submission Deadline: **November 15, 2009**
- * Proposal Acceptance Notification Deadline: **December 15, 2009**
- * Workshop /Special Session Program, TOC and Chair Message Due: **March 15, 2010**
- * Workshop/ Special Session Final Camera-ready Manuscripts and Registration Due: **April 15, 2010**

For further information or questions, please consult the symposium web site at URL:
